ACMA Findings

The Australian Communications Media Authority has made findings about complaints over a Four Corners episode "Lords of the Forest", broadcast on February 16, 2004. ACMA finds the program failed to make every reasonable effort to ensure the program was impartial – citing presentation style including language, tone and footage. ACMA finds the program did not breach ABC requirements for balance with regard to people interviewed and points of view presented. ACMA also finds factual errors acknowledged by the ABC were not corrected in a timely manner.
