Hi Brian and Derek,

As you are aware, following a referral to scientific services from Nigel Sargent, Manager South-east Region, Wayne Cook was engaged to produce a report on Wonboyn Lake and potential sources of sediment into the lake following a large storm event.

This report was presented in draft form at a community forum in February 2016 and provided to Forestry Corporation.

Forestry Corporation have been critical of the findings in the report and have produced their own report (attached) and have requested a review of the original report.

Can you assist and provide some advice as to whether there is a need to revise the report in light of the forestry report?

Happy to discuss,

Regards

Sandie

Michael

As discussed can you pls work with the team to come up with an approach for finalising documents on this matter and then releasing. Pls make sure that you discuss this approach with me and then once we agree I will get you to discuss with Dean, and resolve a way forward.

Pls note that I have advised Dean that I have asked you to oversee this process and work with him to finalise.

Tks

Gary
